

"SOLE SOURCE" PROCUREMENT JUSTIFICATION

Sole source purchases are goods and services available from only one vendor. There may be just one vendor because of patents or copyrights or simply because the vendor is the only one which supplies the good or service. Using Department must provide a written explanation as to why only this particular product/service is acceptable and why no other will be suitable or acceptable to meet the need. A quote must accompany this form.

Department name: Las Cruces Fire Department

1. Name of product or service: "Decon Tect" Decon kit
2. Name of product manufacturer: First Line Technology
3. Name of "sole" product supplier or service provider: First Line Technology
4. Describe in general terms the product/service you are requesting and the intended application.
This is a specific technology and brand of hazardous materials decontamination equipment for use by the Las Cruces Fire Dept. Hazmat Response Team
5. Describe the unique features/capabilities/characteristics that distinguish it from other products/services.
The electrostatic sprayers and Dalgren solution as a kit are only available through First Line Tech. They greatly reduce cross-contamination and decrease use of water for Decon operations.
6. How did you determine there was only one source for the product or service? Provide information on the research that was performed to locate suppliers for this product(s) or service(s). (Please furnish names, addresses and other documentation).
Please see the attached Sole Source letter from First Line Tech.
7. What product supplier or service provider has your Department used until now to satisfy similar requirements?
The last similar equipment purchase was made over 10 years ago and I do not have any accurate information available regarding the supplier(s) used at that time.

 PO Box 20000
 Las Cruces, NM 88004

First Line Technology, LLC (FEIN 20-0247713) is the sole-source provider of the **FiberTect** and **Dahlgren Decon** sold individually and in Kits that are part of the **DeconTect** product line used in personnel, equipment and infrastructure decontamination.

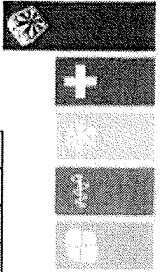

FiberTect is the only technology that provides dry decontamination without the need of water, other liquids, or additives to achieve greater than 95% chemical and particulate efficacy. FiberTect also is the only decontamination technology that has successfully been tested to be compatible with all other fielded decontamination technologies and is compatible with all materials.

FiberTect is a three layer, inert, flexible, drapable, nonwoven composite substrate for absorbing and adsorbing chemical warfare agents (CWA), toxic industrial chemicals (TICs), and pesticides. FiberTect is self-contained and packaged for easy use, storage, and transport. Materials used in the outside layers may vary to provide both absorption and adsorption properties and multiple functional uses.

First Line is the exclusive patent licensee and manufacturer of Dahlgren Decon. Dahlgren Decon is a three-component solution that can immediately decontaminate chemical and biological warfare agents. Dahlgren Decon can be used on personal protective equipment (PPE), equipment, and critical infrastructure. Dahlgren Decon has at least a 10-year shelf life in storage and will be efficacious for at least six hours after being mixed with any available water source – fresh water, salt water, and brackish water are all proven effective. Live-agent testing indicates that the surfactant-based decontamination formula with Dahlgren Decon is the only product on the market that is capable of 100% neutralization of HD in less than 2 minutes, 100% neutralization of GD in 5 minutes, and approximately 95% neutralization of VX in 15 minutes with no toxic byproducts observed. Dahlgren Decon is can decontaminate 100% of fentanyl in less than 5 mins after application.

The following is a brief listing of DeconTect products that First Line Technology is the sole-source manufacturer and provider for:

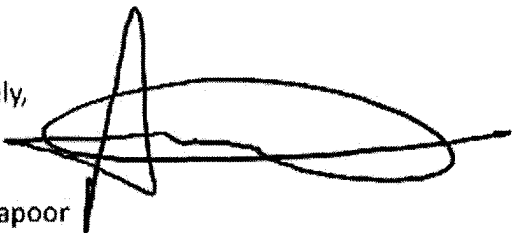

Item	Item ID
Dahlgren Decon (DD) - 22 oz-Case of 5 RTU	DD-022-05-RTU
