SUBJECT: Emergency request for Sunland Park Wastewater Plant

On February 26th both the Variable Frequency Drives (VFD) failed at the belt press of the Sunland Park Wastewater Plant. One VFD controls the speed of the belt press that eliminates the water from the sludge so that we can safely dispose of this sludge at the Camino Real Regional Landfill. The other VFD controls the speed of the sludge that is processed by this belt press.

The plant based on not having a functional belt press is backed up with sludge therefore creating issue with us meeting NPDES Permit No. NM0029483. This permit requires that we process the sludge and dispose of in accordance to the 40CFR503 requirement to not in danger the public or contaminate the land fill.

The cost for this work is \$13,126.30 which includes a field service fee of \$3,700 but does not include gross receipts. This is a sole source issue because they are the manufacture of the belt press and the control panel holds the VFD's and control the equipment. Your attention to this matter is appreciated.

If you have any questions, please feel free to contact me at any time.
